

## MANGALMURTI POLYMERS PVT. LTD.

Mangalmurti polymers has set up State of The Art Cast Stretch Film Line with an annual Production Capacity of 3000 MT/annum. These films protect your products from scratches, abrasions, stains and other damage and ensure that they reach your customers as good as new. Our Cast Stretch Films can be used for variety of loads and can help create load Saucerisation for your goods in transit. Mangalmurti uses special & High Quality polymers to ensure the products are stable and of high quality to ensure better yield to our customers

Mangalmurti polymers offer various range of stretch films

### **Machine roll**

We offer the best stretch film to meet or exceed customers' expectations. We selected the premium stretch films in the market today and committed our supply partners to manufacturing standards of the highest level. The end results are high quality, user friendly products that perform in almost any packaging environment. We created performance choices in four distinct product categories for machine film applications to allow clients the flexibility they need in selecting the best films for their own particular applications. Stretch Films have been widely adopted in the market, High performance machine stretch films are designed to cover a broad range of high performance applications. These performance plus cast stretch films provide excellent load retention, puncture resistance and greater cost efficiencies compared to other stretch films of like gauge and attributes

### **Tinted Stretch Wrap Film**

Variety of coloured stretch films to meet your stretch wraps packaging and palletizing needs. Coloured pallet wrap films are ideal for product identification, product coding, product dating, secure tamper evident packaging, pallet load aesthetics as well as pallet load identification.

Tinted stretch wrap film / pallet wrap film is available in a variety of colours including:

- ❖ Red stretch wrap film
- ❖ Black stretch wrap film
- ❖ White stretch wrap film
- ❖ Blue stretch wrap film
- ❖ Orange stretch wrap film
- ❖ Green stretch wrap film
- ❖ Yellow stretch wrap

Coloured stretch films are offered in hand film as well as machine grade films.

## Opaque White / Black Stretch Wrap

Opaque Black stretch wrap film and opaque white stretch wrap films to conceal, secure and protect your pallets.

Opaque stretch wrap / pallet wrap films are ideal for product identification, product coding, product dating, secure tamper evident packaging, pallet load aesthetics as well as pallet load identification.

Opaque black stretch wrap film and opaque white stretch wrap film is available in both machine grade and hand grade stretch film.

## Clear Stretch Wrap Film

Clear stretch wraps film for pallet wrapping and bundling applications.

Clear stretch wrap / pallet wrap films represents the broadest range of stretch wrap packaging films. A complete range of gauges, sizes, brands, and performance range options are available to meet your palletizing, unitizing and bundling supply needs.

Clear stretch wrap films is the most common stretch wrap used today and is offered in machine grade film, hand grade films and specialty stretch films in a full range of performance levels.

## UVI Stretch Wrap Film

Ultra Violet Inhibitor (UVI) stretch films.

UVI stretch films are used to palletize products that are stored outside for long periods of time. Ultra violet rays weaken non UVI stretch wrap products causing them to lose strength and load integrity.

UVI films will better protect your pallets from prolonged ultra violet ray exposure. With quality UVI pallet wrap films you can be confident your product will be prepared to endure outdoor elements for extended periods of time. Available in hand wrap or machine wrap rolls.

## VCI Stretch Wrap Film

VCI stretch films. VCI stretch films contain **Vapor Corrosion Inhibitor** properties to provide anti-corrosion protection to stretch wrap packaging applications. Our VCI stretch films deliver cost effective corrosion protection to ferrous and non-ferrous metals, metal parts and the like. With high quality VCI films you get the combined benefit of barrier and anti corrosion protection in an easy to use form that involves no grease, no messy oils or surface protection. The VCI vapours completely penetrate all areas of the product and will provide up to 2 years of anti-corrosion protection. VCI stretch film is available in machine grade and hand grade rolls.

## Heavy Gauge Film

Heavy gauge stretch wrap & pallet wrap films. Heavy gauged stretch film for heavy duty bundling, securing, unitizing and palletizing. Variety of machine grade and hand grade heavy gauge stretch film is available. Heavy gauge films, range between 150 to 300 gauges. Stretch wrapping is a more economical bundling / palletizing solution compared to other methods such as tape, strapping or twine. Film will only cling to itself not the product being wrapped.

## Bundling Film

Bundling with smaller rolls of stretch wrap. Sizes: 10-18" Widths in cast or blown stretch film.

Bundling film has many uses, including:

- Reduces shipping charges with FED EX/ UPS Shippers and protects your shipments
- Replaces taping adhesives and leaves no residue.
- Easy to apply and remove
- Replaces twine in the bundling of wood, dowels and pipe
- More economical than tape, strapping and twine

Bundling film is available in cast stretch film or blown stretch film rolls.

## Advantage of stretch films:

### Stretch Wrapping Delivers Superior Protection

- Stretch wrap loads are more secure which minimize shipping damages
- UVI stretch films can protect products stored outdoors from UV rays.
- Strong opaque films conceal load contents and reduce instances of pilferage
- Stretch films keeps products free of dust, moisture and dirt

### Stretch Wrapping Is Cost Effective

- Stretch wrap film is more cost effective than alternatives such as strapping, corrugated or heat shrink film
- Stretch wrap equipment typically cost less than same calibre alternatives like shrink wrapping and strapping equipment.
- Stretch wrappers uses less energy to operate than other unitizing methods like shrink wrap systems.

### Stretch Wrapping Is More Efficient

- Increased packaging operation efficiency
- Improved Inventory control
- Increases worker productivity
- Scan-through optics
- Versatility of pallet load types

### Stretch Wrap Is Versatile

Stretch wrap films come in a wide variety of standard and special attribute blends to address many stretches wrap packaging application needs. Such as,

- **Colour stretch films** examples: tinted stretch wrap films, film, opaque clear stretch wrap)
- **Specialty stretch films** examples: UVI stretch films, VCI stretch films, Heavy Gauge films, Roll wrap films, bundling film, banding film, wide web pallet wrap, vented stretch wrap, stretch wrap netting, pallet covers and top sheeting film, wrap and more pallet wrap solutions.
